

A POWERFUL TRIO OF **COLLAGEN - ELASTIN - HYALURONIC ACID**

to fight the signs of skin aging

SMOOTHS OUT WRINKLES

Ovoderm® activates your body's natural **collagen and elastin production**, key structural proteins that fill your skin and maintain its **elasticity** and **firmness**, leading to reduction on the appearance of wrinkles and fine lines.

ANTIOXIDANT PROTECTION

Ovoderm® protects skin from oxidative stress that breaks down collagen and hinders skin's natural repair process. Due to its high **antioxidant activity**, Ovoderm® helps prevent visible damage produced by free radicals.

BOOSTS SKIN HYDRATION

Ovoderm® restores **skin barrier function** reducing transepidermal water loss and stimulates **hyaluronic acid synthesis**, a molecule naturally found in our skin that holds skin moisture and helps keep it hydrated and glowing.

REDUCES AGE SPOTS

As we age, our melanocytes (pigment cells) multiply more quickly and can cluster together to form age spots. Ovoderm® helps reduce hyperpigmentation and the appearance of age spots providing an **uniform skin tone**.

beauty begins from within.
