aXivite

aXivite® is a patented and Novel Food authorised innovative natural analogue capsaicin solution, also known as Phenyl-capsaicin. It's offered by the innovative Swedish biotechnology company aXichem.

aXivite® shows its great potential especially in weight control products. Studies show that capsaicin consumption has proved to reduce body weight and has the potential to treat obesity.

Recognised as a bioenhancer, its bioavailability is up to 8 times higher than natural capsaicin.

The unique microencapsulation of the active ingredient at 1% concentration is safe and easy to handle as well as to develop finished products with.

Its purity and concentration are exceptional, making it reliable and efficient for high volume industrial production.

ovomet®

An Eggshell-Membrane Powder for nutraceutical products (human) with the indication of joint-health. Ovomet® is a anti-inflammatory, pain-relieving “joint regenerator” as well as pain-reliever for Arthritis. Protects from injuries e. g. while doing sports.

ovoDerm®

An Eggshell-Membrane Powder for nutraceutical products (human) for beauty inside out products. Ovoderm® leads to softer skin, healthy hair and firmer nails.

ovoPet®

An Eggshell-Membrane Powder for nutraceutical products (veterinary) with the indication of joint-health. Ovopet® is a anti-inflammatory, pain-relieving “joint regenerator”. Pain-reliever for Arthritis and hip dysplasia.

ovocet®

A highly bioavailable Calcium Carbonate for the use in nutraceuticals for humans and pets.

This naturally-sourced spearmint extract is clinically shown to support focus during the day without disrupting sleep at night. The antioxidant polyphenols in Neumentix promote new brain cell growth and support a function of the brain called working memory; thus improving the ability to learn, manage information and react. Neumentix provides both cognitive and physical performance benefits and can be formulated into a variety of applications.

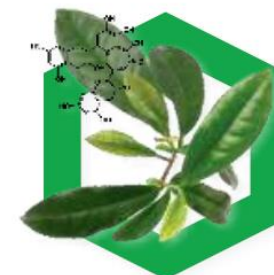

Special Blend from Exclusive Plants supports natural sleep, natural relaxing and promotes concentration

SPEARMINT POLYPHENOLS

Rosmarinic acid is a natural antioxidant polyphenol and has been shown to increase healthy neurotransmission by raising levels of acetylcholine in the brain¹⁻²

GREEN TEA POLYPHENOLS

Epigallocatechin Gallate (EGCG) is a natural antioxidant polyphenol in green tea which may support calming gamma-aminobutyric acid (GABA) neurotransmitters³⁻⁴
