

PRODUKTINFORMATION

herbageen® amino

herbageen® amino

This product has been specially developed for use in agriculture as a soil or foliar fertilizer. Herbageen® amino complies with EC Regulation 834/2007 and is approved for use in organic farming.

Composition:

Nitrogen (N) total 7%
Nitrogen (N) water-soluble organic 7%
Carbon (C) of biological origin 21%
Extracts of ascophyllum nodosum 5%

Dosage and Recommendation:

Surface fertilization:

- arable crops: 4-6 kg / ha
- tree crops: 6-8 kg / ha
- horticultural crops intensive and green house: 1-2 kg / 1000m²

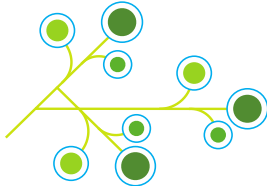

Leaf fertilization:

Misty spraying of green plant parts in the morning and evening hours.

- in fruit, wine and horticulture every 10-21 days 150-250 g / 100 liter
- in olive groves 6-7 times a year 250-300 g / 100 liter
- for agriculture cultivations 3-4 times during the growing season 150-250 g / 100 liter
- horticulture crops intensive and green house: 200-250 g / 100 liter

The usual spraying and fogging instruments are used. Use of herbageen amino preferably in the early stage of development of young plants to support and promote growth.

Please note the respective crop data sheets!

The application of herbagreen amino supports the following parameter:

- Yield increase
- Shortened maturity time
- Enlargement of bio mass
- Improvement of nitrogen supply
- Prolongation of storage stability for berries and fruits
- Even growth of fruits

Safety note:

- Observe the usual protective measures during use
- Do not breathe in spray mist.
- Keep out of reach of children and pets!
- After eye contact wash off with water.
